

AFTER BABY ARE DOULA

BECKY PFAFF, CPD

Professional Philosophy:

Bringing a baby home in the first hours, days and weeks is a very special time, yet can be highly challenging for new parents. My role is helping them transition, to allow recover and rest at their own pace and to help them benefit from my education and experience. Also to ease and enhance the postpartum period, making the time most memorable, restful and an enjoyable experience.

Why I am passionate about my Work:

I find my work a complete joy and an honor to come into your home to take care of your newborn(s), educate new moms and help families succeed in raising happy, healthy children in a safe environment. It gives me great pleasure to provide a level of confidence in the parents and to provide calmness to families after I have been there to guide and instruct them with their newborn children. I am very reliable, honest and timely. People see me as a very patient and loving person who would be a great addition to any family.
